

Contractor survey results

1 Method

The contractor survey was open to all Bolton pharmacies between January- May 2022 and ran via PharmOutcomes. A copy of the survey is in 6 (p36). All but one of Bolton's 73 pharmacies completed the survey; the pharmacy which did not complete the survey was a Distance Selling Pharmacy, so many of the questions relating to facilities provided on premises would not have applied to them.

2 Results

2.1 Opening hours and lunchtime closures

A range of pharmacy opening hours were available around the borough. Of the 65 non distance selling pharmacies, 28 had at least one weekday opening (before 9:00), 34 had at least one weekday early evening opening (18:00-21:00); 12 had at least one late evening opening (from 21:00); 48 were open on Saturdays; 19 were open on Sundays. 16 pharmacies had a weekday lunchtime closure every day, 3 closed for lunch some weekdays, 46 had no lunchtime closures. (see Table 14, p18; Table 15, p20; Table 16, p23; Table 17, p25; Figure 3, p14; Figure 4, p15; Figure 5, p16; Figure 6, p17).

2.2 Potential for increased demand

The majority of pharmacies would be able to meet increased demand either within their existing premises and staffing levels or by making adjustments. 2/3 pharmacies in Little Lever said they would have difficulty in managing an increase in demand, although the third said they had sufficient capacity to manage an increase in demand. Should there be large increase in demand in this area beyond that expected at present, there may be a need for additional services.

Table 1: Pharmacies' ability to meet increased demand

Answer options	Count
We don't have sufficient premises and staffing capacity and would have difficulty in managing an increase in demand.	8
We don't have sufficient premises and staffing capacity at present but could make adjustments to manage an increase in demand in our area	12
We have sufficient capacity within our existing premises and staffing levels to manage an increase in demand in our area	52
Total	72

2.3 Consultation facilities

Considering non distance selling pharmacies, 46/65 had a wheelchair accessible consultation room available, clearly designated as a room for confidential conversations distinct from the general public areas of the pharmacy premises and where both the person receiving the service and the person providing it can be seated together and communicate confidentially. A further 18 had a non wheelchair accessible consultation room. All were enclosed consultation areas. 1 pharmacy was approved by NHSE&I as being too small for a consultation room. 62/64 pharmacies had 1 consultation room, while 2 pharmacies had 2 consultation rooms.

The pharmacy without the consultation room had also noted that they didn't have sufficient premises and staffing capacity and would have difficulty in managing an increase in demand, however 2 other pharmacies with wheelchair accessible consultation space are in close proximity.

Considering all pharmacies, 16/72 were willing to undertake consultations in a patient's home or other suitable site.

Of the 64 non distance selling pharmacies with on site consultation rooms, 16 had no access to patient hand washing facilities. 47 had patient hand washing facilities in or close to the consultation area, and 1 had handwashing in the toilet facilities.

2.4 Services

All types of appliances were able to be dispensed in a range of pharmacies (Table 2, p3). All advanced services were provided in at least one pharmacy in Bolton, but fewer provided Appliance Use Review or Stoma Appliance Customisation (Table 3, p4).

Considering services that were or could be commissioned by NHS England Area Team, Local Authority or CCG, home delivery (not appliances) was the commissioned service most frequently provided currently either NHS funded or a company led or private service (Table 4, p4). No pharmacies were currently offering anticoagulant monitoring or a schools services although a number were willing.

Dressings and palliative care scheme were the most frequently offered urgent care services, more pharmacies were willing to offer a range of urgent care services if they were commissioned (Table 5, p5).

Few pharmacies were currently providing disease medicines management services, although small numbers offered a range, most commonly asthma, hypertension or COPD. Many were

willing to provide these services if commissioned (Table 6, p5). One pharmacy mentioned that they did an inhaler technique service.

Among public health services, Supervised administration (of methadone, puphrenorphine etc) was most frequently provided as an NHS service, followed by Emergency hormonal contraception, and smoking related services (Table 7, p6). Where supervised consumption was provided, at all but one pharmacy this was done in a separate private room either routinely or at patient request.

Many pharmacies were willing and able to provide the range of screening services suggested, but few currently provided any (Table 9, p7).

Pharmacies were most likely to currently provide seasonal influenza vaccination, with only small numbers providing other vaccinations either NHS commissioned or as a private/ company led service, however many were willing to do so if commissioned (Table 10, p7).

Pharmacies providing selected services are given in Table 19, p25; Table 20, p29; Table 21, p32.

2.5 Accessibility

Considering all pharmacies, only 9/72 did not provide collection of prescriptions from surgeries. 60/72 provided free delivery of dispensed medicines, of the 12 who did not provide free delivery, 7 provided chargeable delivery. 5 pharmacies provided neither free nor chargeable delivery, however other pharmacies that did offer delivery were in close proximity to these (Figure 2, p13).

Considering all pharmacies, 58/72 offered free monitored/ community dosage systems on request if not covered by the Equality Act. None of the 14 who did not offer this provided it as a chargeable service.

Of the 65 non distance selling pharmacies, a little under half of pharmacies, 29, had dedicated cycle parking (such as racks or stands) within 50m, while 36 did not. Just 2 pharmacies had no public transport stops within 1km (12 minutes' walk) Only 1 pharmacy did not have legal car parking within 50m, this pharmacy did not have disabled car parking, however a bus/ train stop was within 100m. 36 pharmacies had dedicated disabled customer car parking available.

Among non distance selling pharmacies, 49/65 pharmacies had entrances suitable for unaided wheelchair access, and of these 48 had all areas of the pharmacy floor accessible by wheelchair. Other measures reported to support accessibility included large print labels/ leaflets, hearing loop, automatic door assistance and ramped access (Table 12).

Table 11: Public transport access to pharmacies – bus stop or train station availability

Distance	Walk time at 5kmph (mins)	Count
Within 100m	1	45
100m to 500M	6	13
500M to 1000M	12	5
1000M+	over 12 mins	2
No Bus Stop/Train Station	NA	0
Total		65

Table 12: Other accessibility measures reported by non Distance Selling Pharmacies

Large print labels	23
Hearing loop	16
Large print leaflets	14
Automatic door assistance	13
Wheelchair ramp access	13
Bell at front door	9
Bell at front door	9
Toilet facilities accessible by wheelchair users	8

Among all pharmacies, 53/72 were able to offer support to people whose first language is not English, 35 of these provided an interpreter/ language line, 48 of these had staff who spoke languages other than English. Most common languages spoken were Urdu, Gujarati, Hindi and Punjabi but a range of other languages were spoken (Table 13). 37/72 were able to provide advice and support all the time if a customer wished to speak to a person of the same sex, and a further 23 could do so by appointment, only 12 were unable to do this.

Pharmacies were able to say if they were aware of any gaps in access or pharmaceutical need for any groups sharing a protected characteristic. One pharmacy identified they had no male staff, however no other specific issues were highlighted.

One pharmacy suggested a need for “Out of hours palliative medication supply and quick referral system for needle exchange substance users into structured treatment plan.”

3 Summary and conclusions

The contractor survey was open to all Bolton pharmacies between January- May 2022 and ran via PharmOutcomes. The results revealed a range of services spread around the borough. There were good levels of willingness for provision of wider services, should these be commissioned.

Between January- May 2022 A good response rate was achieved, with all but one of Bolton’s 73 pharmacies completed the survey; the pharmacy which did not complete the survey was a Distance Selling Pharmacy. A range of pharmacy opening hours were available spread around

the borough, including early morning, lunchtimes, early and late evening and weekends. Pharmacies that would have difficulty in managing an increase in demand, are primarily located in areas with other pharmacies nearby. Although there is some scope for increase in capacity in Little Lever a large increase in demand may not be able to be accommodated.

Wheelchair accessible consultation rooms were widely available, but 18 pharmacies had non-wheelchair accessible consultation rooms. All types of appliances were able to be dispensed in a range of pharmacies. All advanced services were provided in at least one pharmacy in Bolton, but fewer provided Appliance Use Review or Stoma Appliance Customisation.

Considering services that were or could be commissioned by NHS England Area Team, Local Authority or CCG, home delivery (not appliances) was the commissioned service most frequently provided currently either NHS funded or a company led or private service (Table 4, p4). No pharmacies were currently offering anticoagulant monitoring or a schools services although a number were willing. Dressings and palliative care scheme were the most frequently offered urgent care services, more pharmacies were willing to offer a range of urgent care services if they were commissioned. Few pharmacies were currently providing disease medicines management services. Among public health services, Supervised administration (of methadone, puphrenorphine etc) was most frequently provided as an NHS service, followed by Emergency hormonal contraception, and smoking related services. Many pharmacies were willing and able to provide the range of screening services suggested, but few were currently provided. Pharmacies were most likely to currently provide seasonal influenza vaccination, with only small numbers providing other vaccinations, however many were willing to do so if commissioned

The large majority of pharmacies provided collection of prescriptions, delivery of dispensed medicines was widely available. A little under half of pharmacies had dedicated cycle parking nearby; only 2 had no public transport access within 1km (12 minutes' walk); only one did not have legal car parking nearby. Among non distance selling pharmacies, 49/65 pharmacies had entrances suitable for unaided wheelchair access, and of these 48 had all areas of the pharmacy floor accessible by wheelchair. Other measures reported to support accessibility included large print labels/ leaflets, hearing loop, automatic door assistance and ramped access

Among all pharmacies, 53/72 were able to offer support to people whose first language is not English, 35 of these provided an interpreter/ language line, 48 of these had staff who spoke languages other than English. Most common languages spoken were Urdu, Gujarati, Hindi and Punjabi but a range of other languages were spoken

Pharmaceutical Needs Assessment Pharmacy Questionnaire 2021 - 2022 (Preview)

Date of completion

Post Code

Is this a Distance Selling Pharmacy? Yes No
(i.e. it cannot provide Essential Services to persons present at the pharmacy)

The purpose of this questionnaire is to gather information in order for local Health and Wellbeing Boards to update their Pharmaceutical Needs Assessment (PNA). Please complete this questionnaire **ONCE** only to report the facilities and services offered by your pharmacy.

Data submitted by completing this form will be viewed by your local council, LPC and NHS England.

Contact Details

Potential for Increased Demand

If there was increased demand for pharmaceutical services (e.g. dispensing, advanced and locally commissioned services) in your local area; through new housing developments, nearby pharmacies closing, etc. demand in your pharmacy may increase. With this in mind please select the option that best reflects your situation at the moment:

Ability to adapt to demand

- We have sufficient capacity within our existing premises and staffing levels to manage an increase in demand in our area
- We don't have sufficient premises and staffing capacity at present but could make adjustments to manage an increase in demand in our area
- We don't have sufficient premises and staffing capacity and would have difficulty in managing an increase in demand.

Consultation Facilities

There is a consultation room (that is clearly designated as a room for confidential conversations; distinct from the general public areas of the pharmacy premises; and is a room where both the person receiving the service and the person providing it can be seated together and communicate confidentially) (tick as appropriate)

Is there a consultation area?

- None, have submitted a request to NHSE&I that the premises are too small for a consultation room
 - None, NHSE&I has approved my request that the premises are too small for a consultation room
 - None (Distance Selling Pharmacy)
 - Available (including wheelchair access)
 - Available (without wheelchair access)
 - Planned before 1st April 2023
 - Other
- If Other please specify

Where there is a consultation area

Is this enclosed? Yes No N/A

N/A if no consultation room

How many enclosed consultation rooms do you have?

Number of Consultation Rooms

- 1
- 2
- 3
- 4+

Please tell us about arrangements made to provide services offsite

Off-site arrangements

- Off-site consultation room approved by NHS
- Willing to undertake consultations in patients home/ other suitable site
- None apply
- Other

If Other please specify

Hand washing and toilet facilities

What facilities are available to **patients** during consultations?

Facilities available

- Hand washing in consultation area
- Hand washing facilities close to consultation area
- Have access to toilet facilities
- None

Tick all that apply

Essential Services (appliances)

In this section, please give details of the essential services your pharmacy provides.

Does the pharmacy dispense the following

- Stoma appliances
- Incontinence appliances
- Dressings
- None

Please tick all that apply

Advanced Services

Does the pharmacy provide the following services?

New Medicine Service Yes Soon No

Appliance Use Review Service Yes Soon No

Stoma Appliance Customisation Service Yes Soon No

NHS Flu Vaccination Service Yes Soon No

NHS Community Pharmacist Consultation Service Yes Soon No

Commissioned Services

Use this section to record which local services you currently deliver or would like to deliver at your pharmacy. These can be Enhanced Services, commissioned by the NHS England Area Team, Public Health Services commissioned by a Local Authority or CCG services. Please tick the box that applies for each service.

CP - Currently providing NHS funded service

WA - Willing and able to provide if commissioned
